

Circular Interface for Music Player

Interface Layout

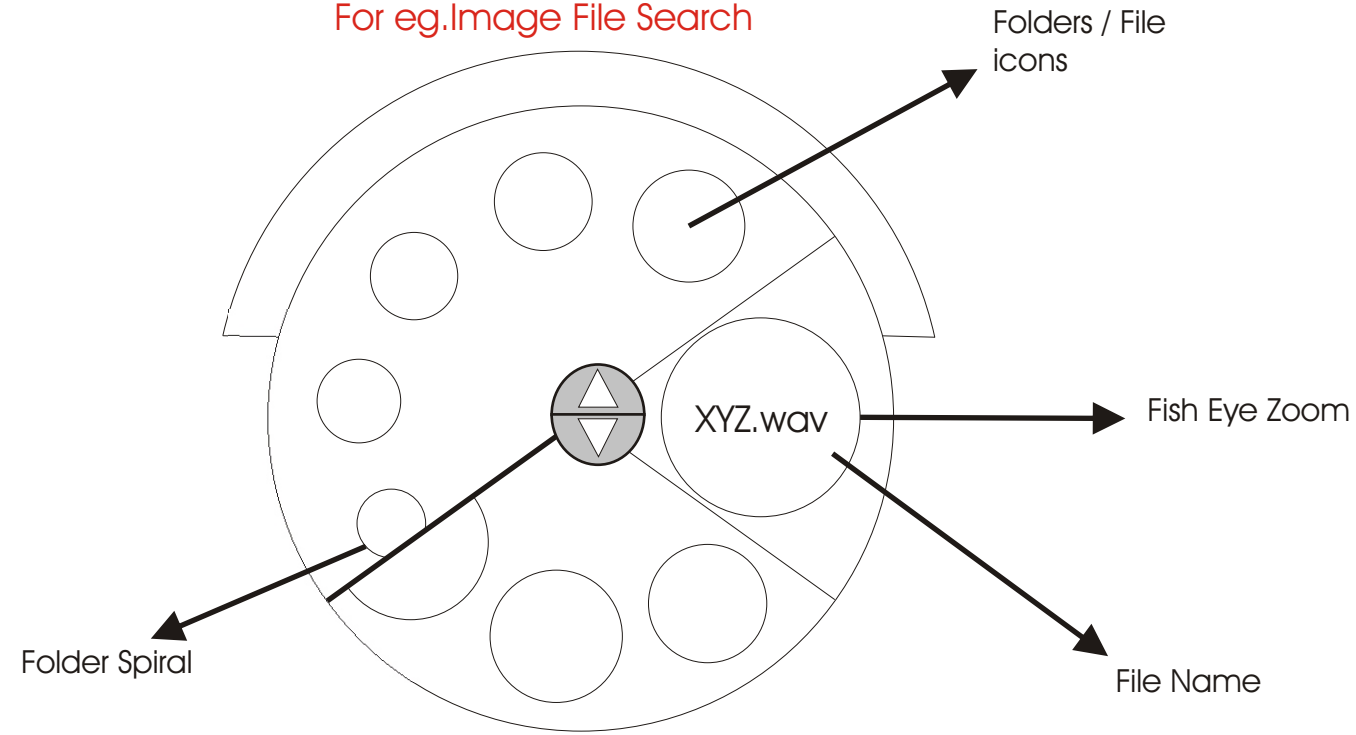

Amit Patil
Software and User Interface Design
National Institute of Design

The user interface can be divided into three major classes:

- Selection Menu
- File Browsing
- Media Play\Display

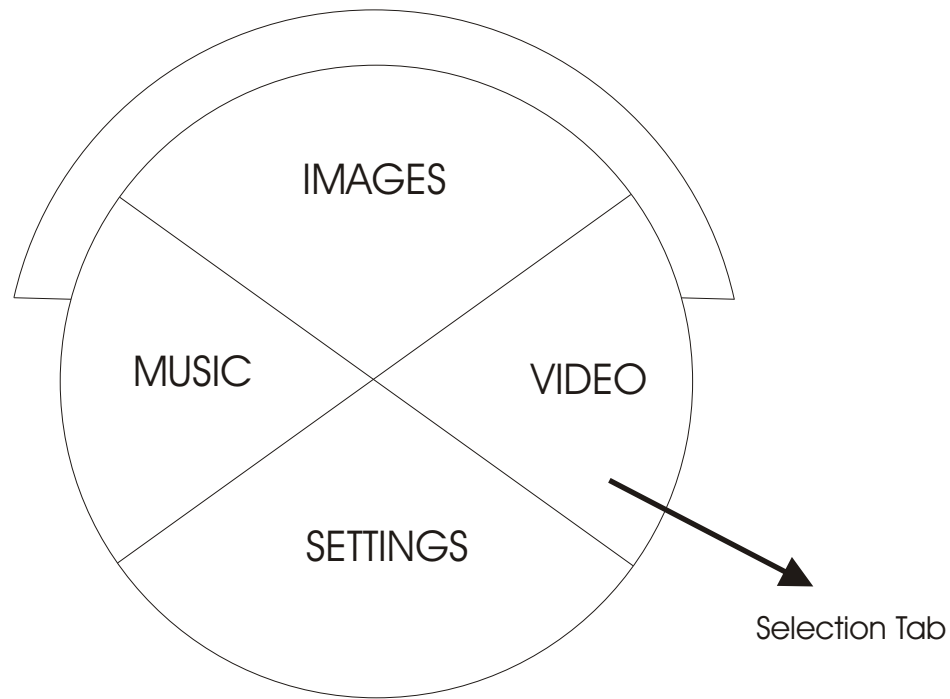

File Browsing

For eg. Image File Search

Selection Menu

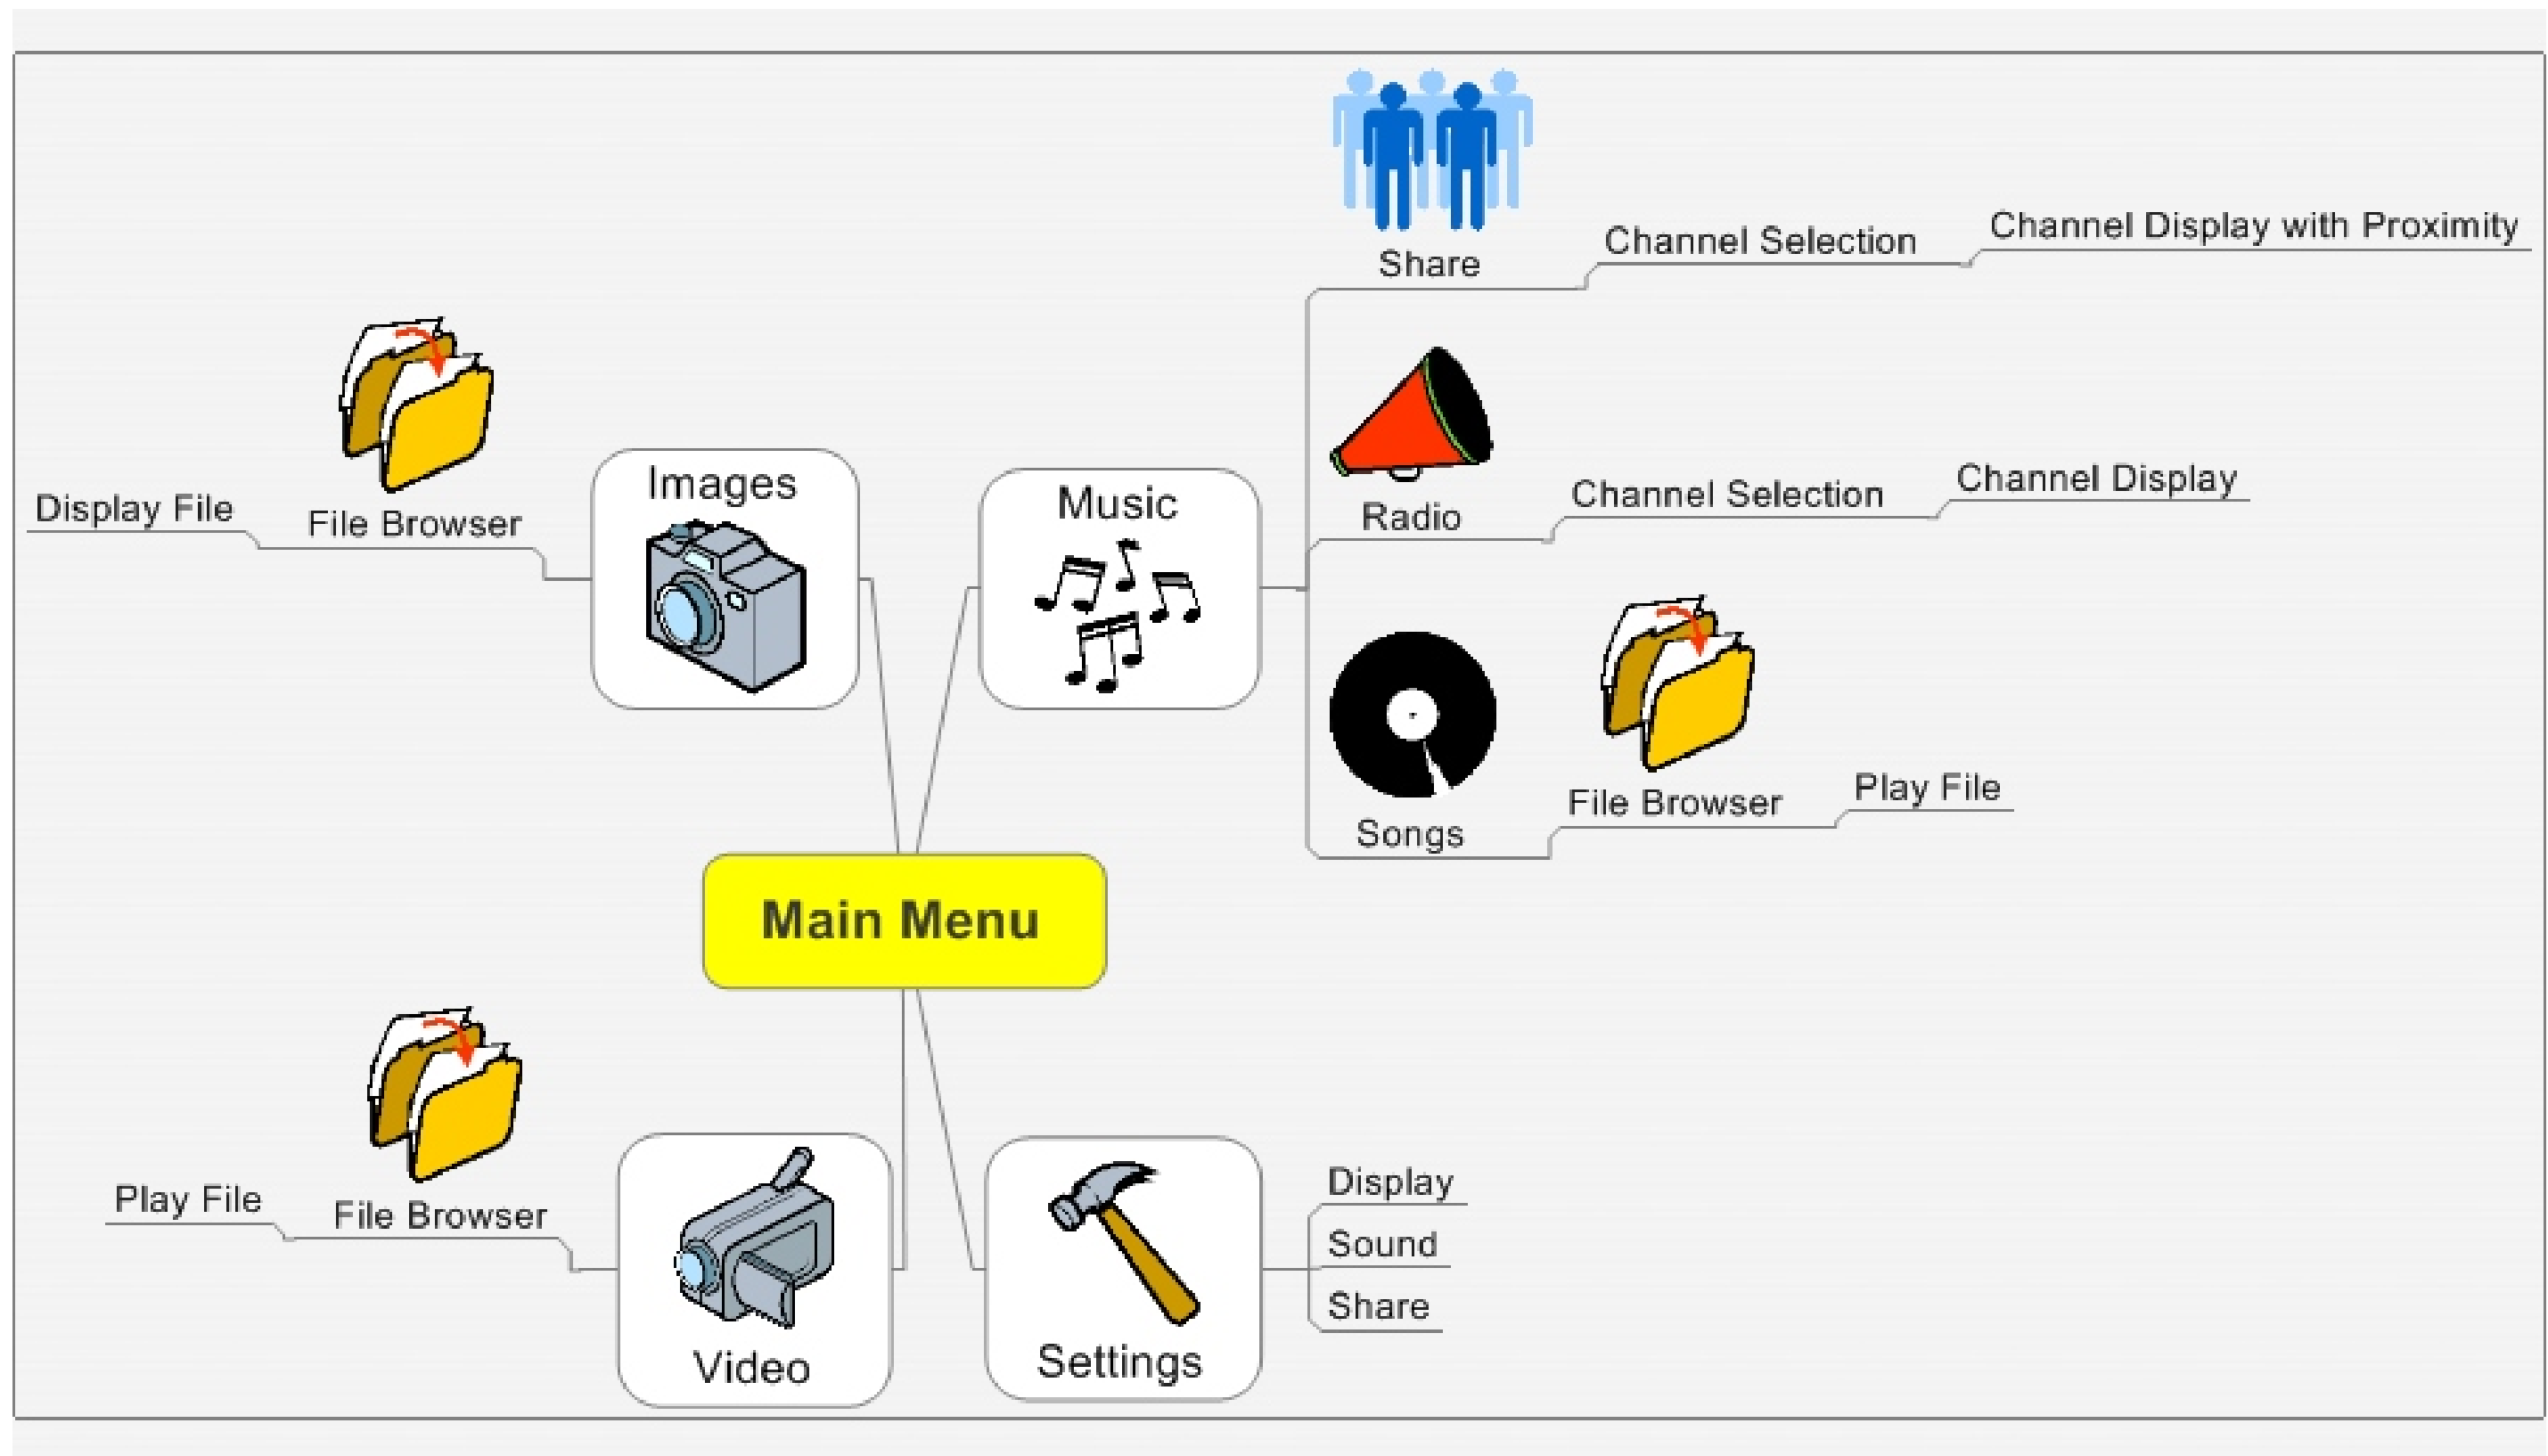

For eg. Main Menu

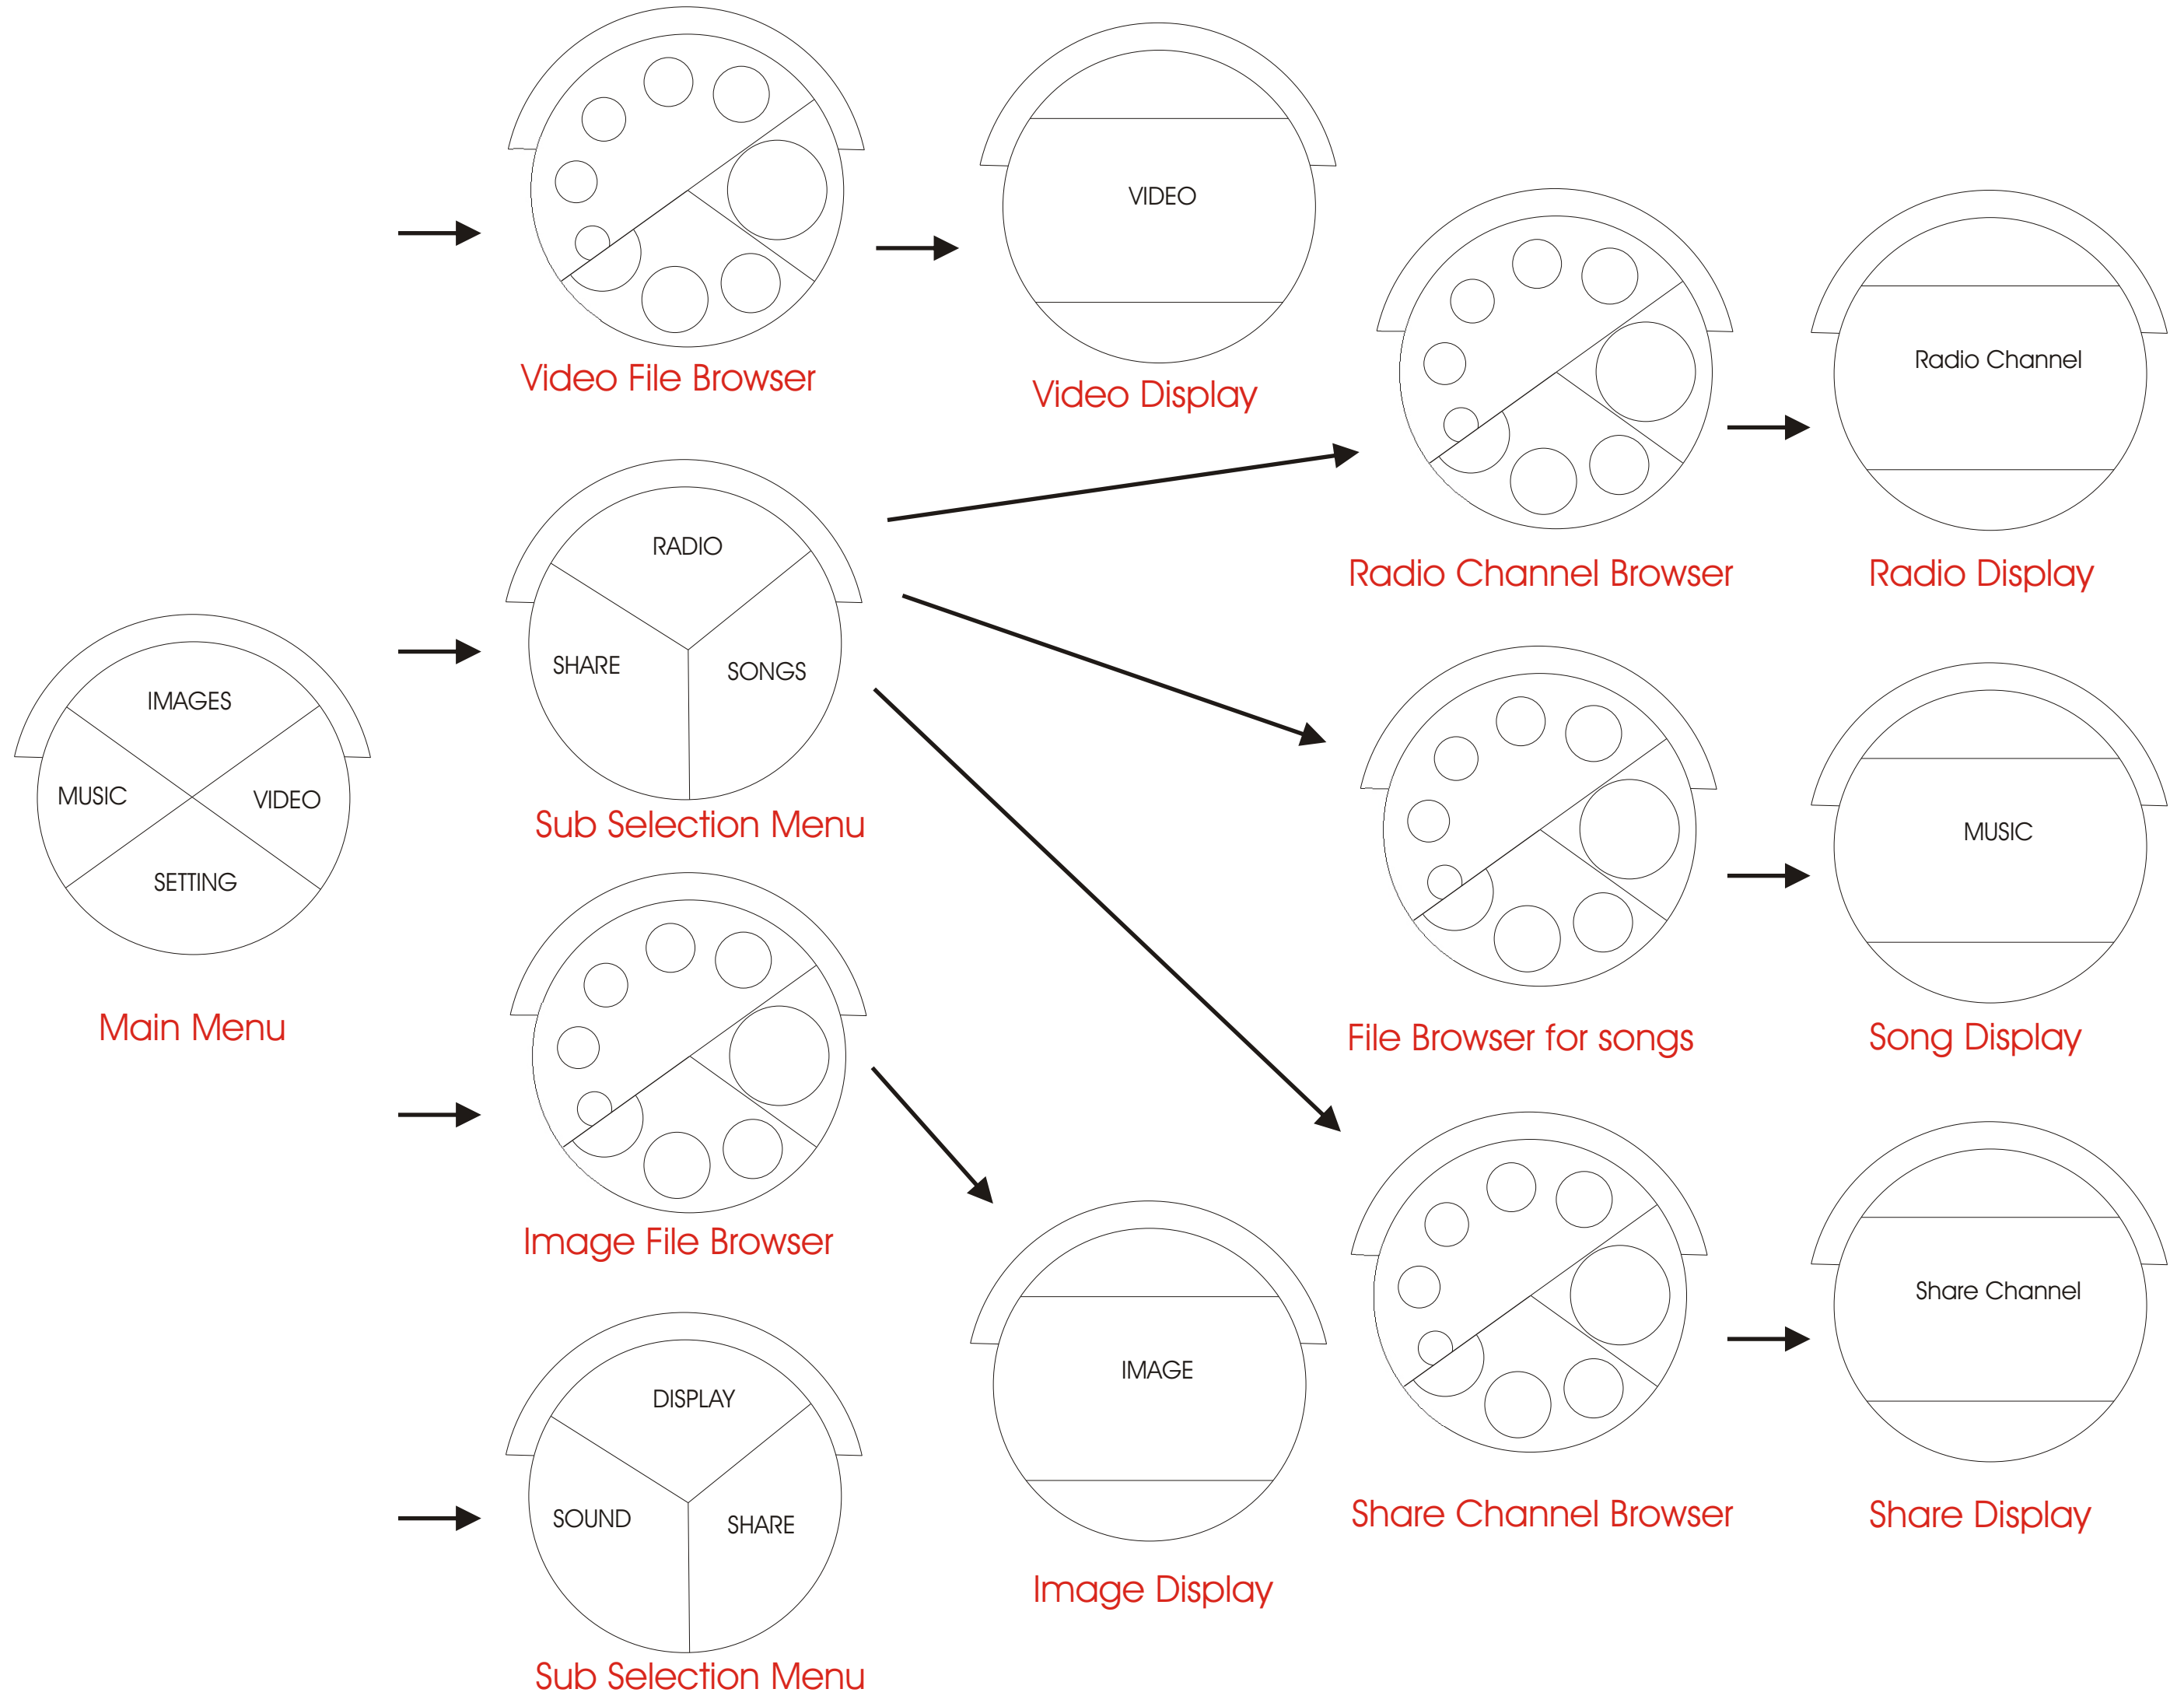

Media Play Interface

For eg. Video Play

Circular Interface layouts: Wire Frames with Information Arch.

Media Play Interface
For eg.Video Play

1. Side Control Area: Rewind, Forward, Next, Last Side controls are slide overs on proximity of fingers.

2. Info Scroll Display Area: Track Name, Next Track, Photo Flip. Information scrolls in this area.

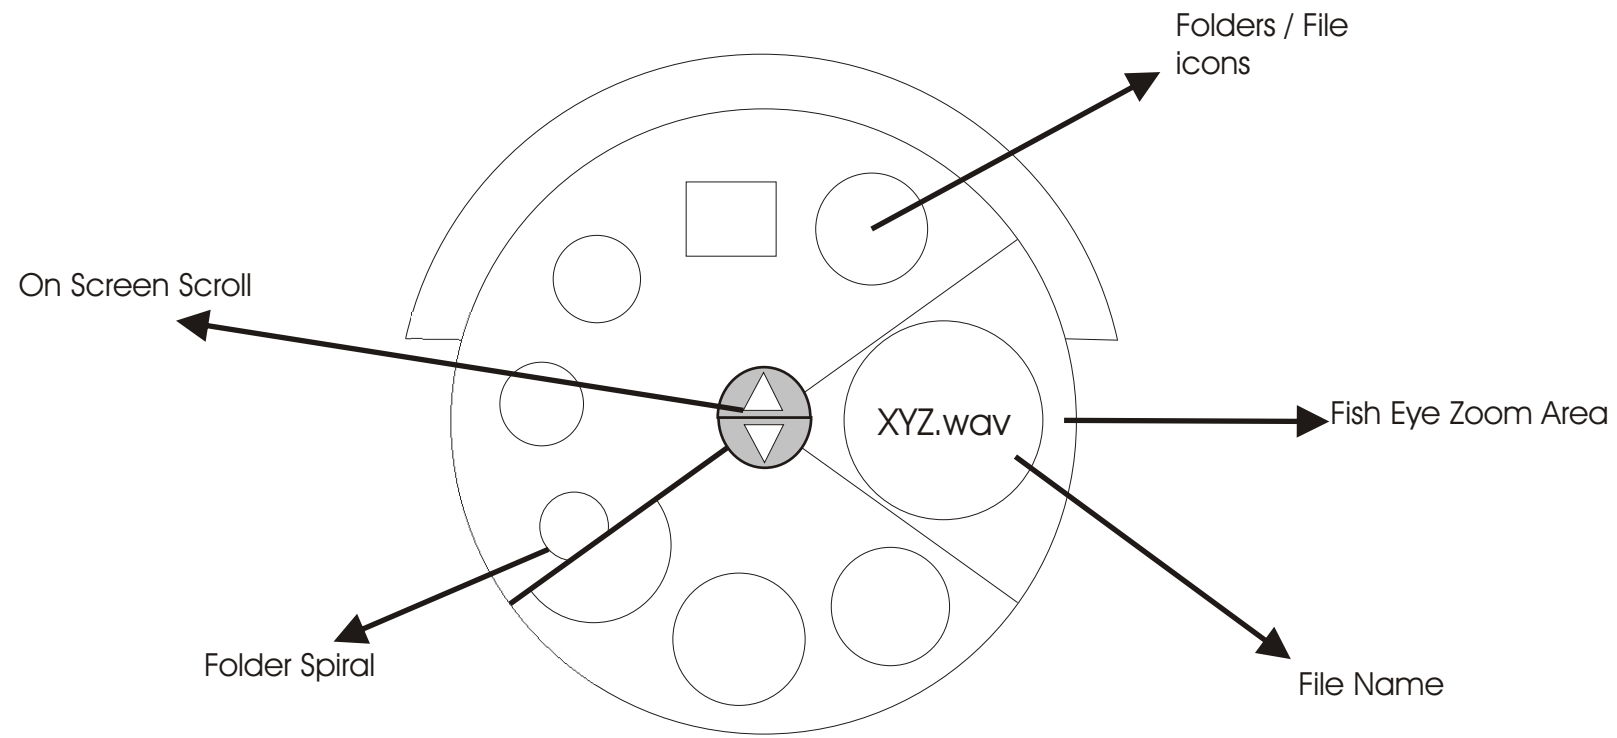

3. Circular Track Area: Time Line(Video, Audio), Zoom Level. This area is outside display area and shows linear time line or meter as per role of interface.

4. Top Control Area: One Level Up, Stop. This area is fixed and allows navigation to go one level up.

5. Data/ Content Area: Video, Music, Radio etc. This is where most of the data is displayed or the display related to the executed data is displayed.

File Browsing For eg. Image File Search

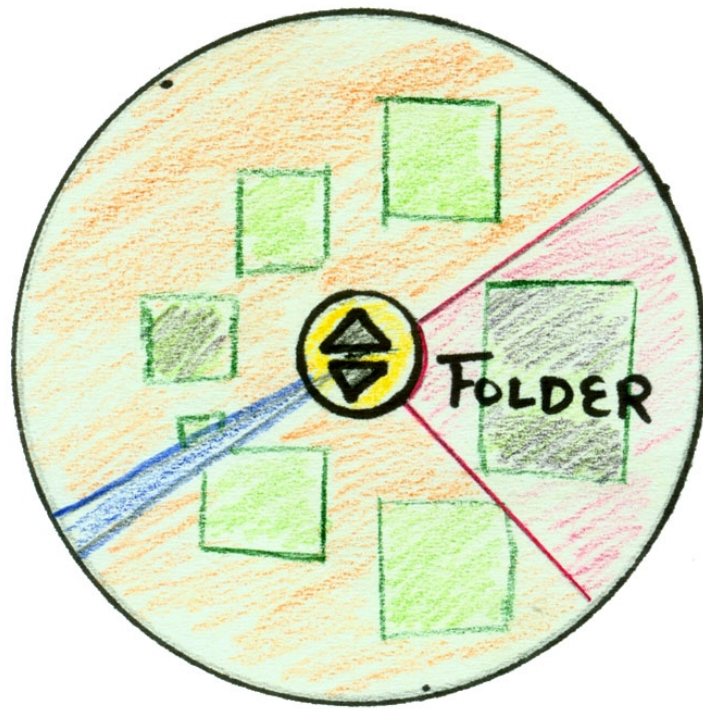

Spiral File structure :

The complete file structure is displayed as if it is a huge spiral.
With each folder on the spiral. The folders are displayed as if they are on the spiral.
The spiral is circular (similar to circular stack) the files and folders will be floating on each of this mega spiral.

Spiral Folder Interaction

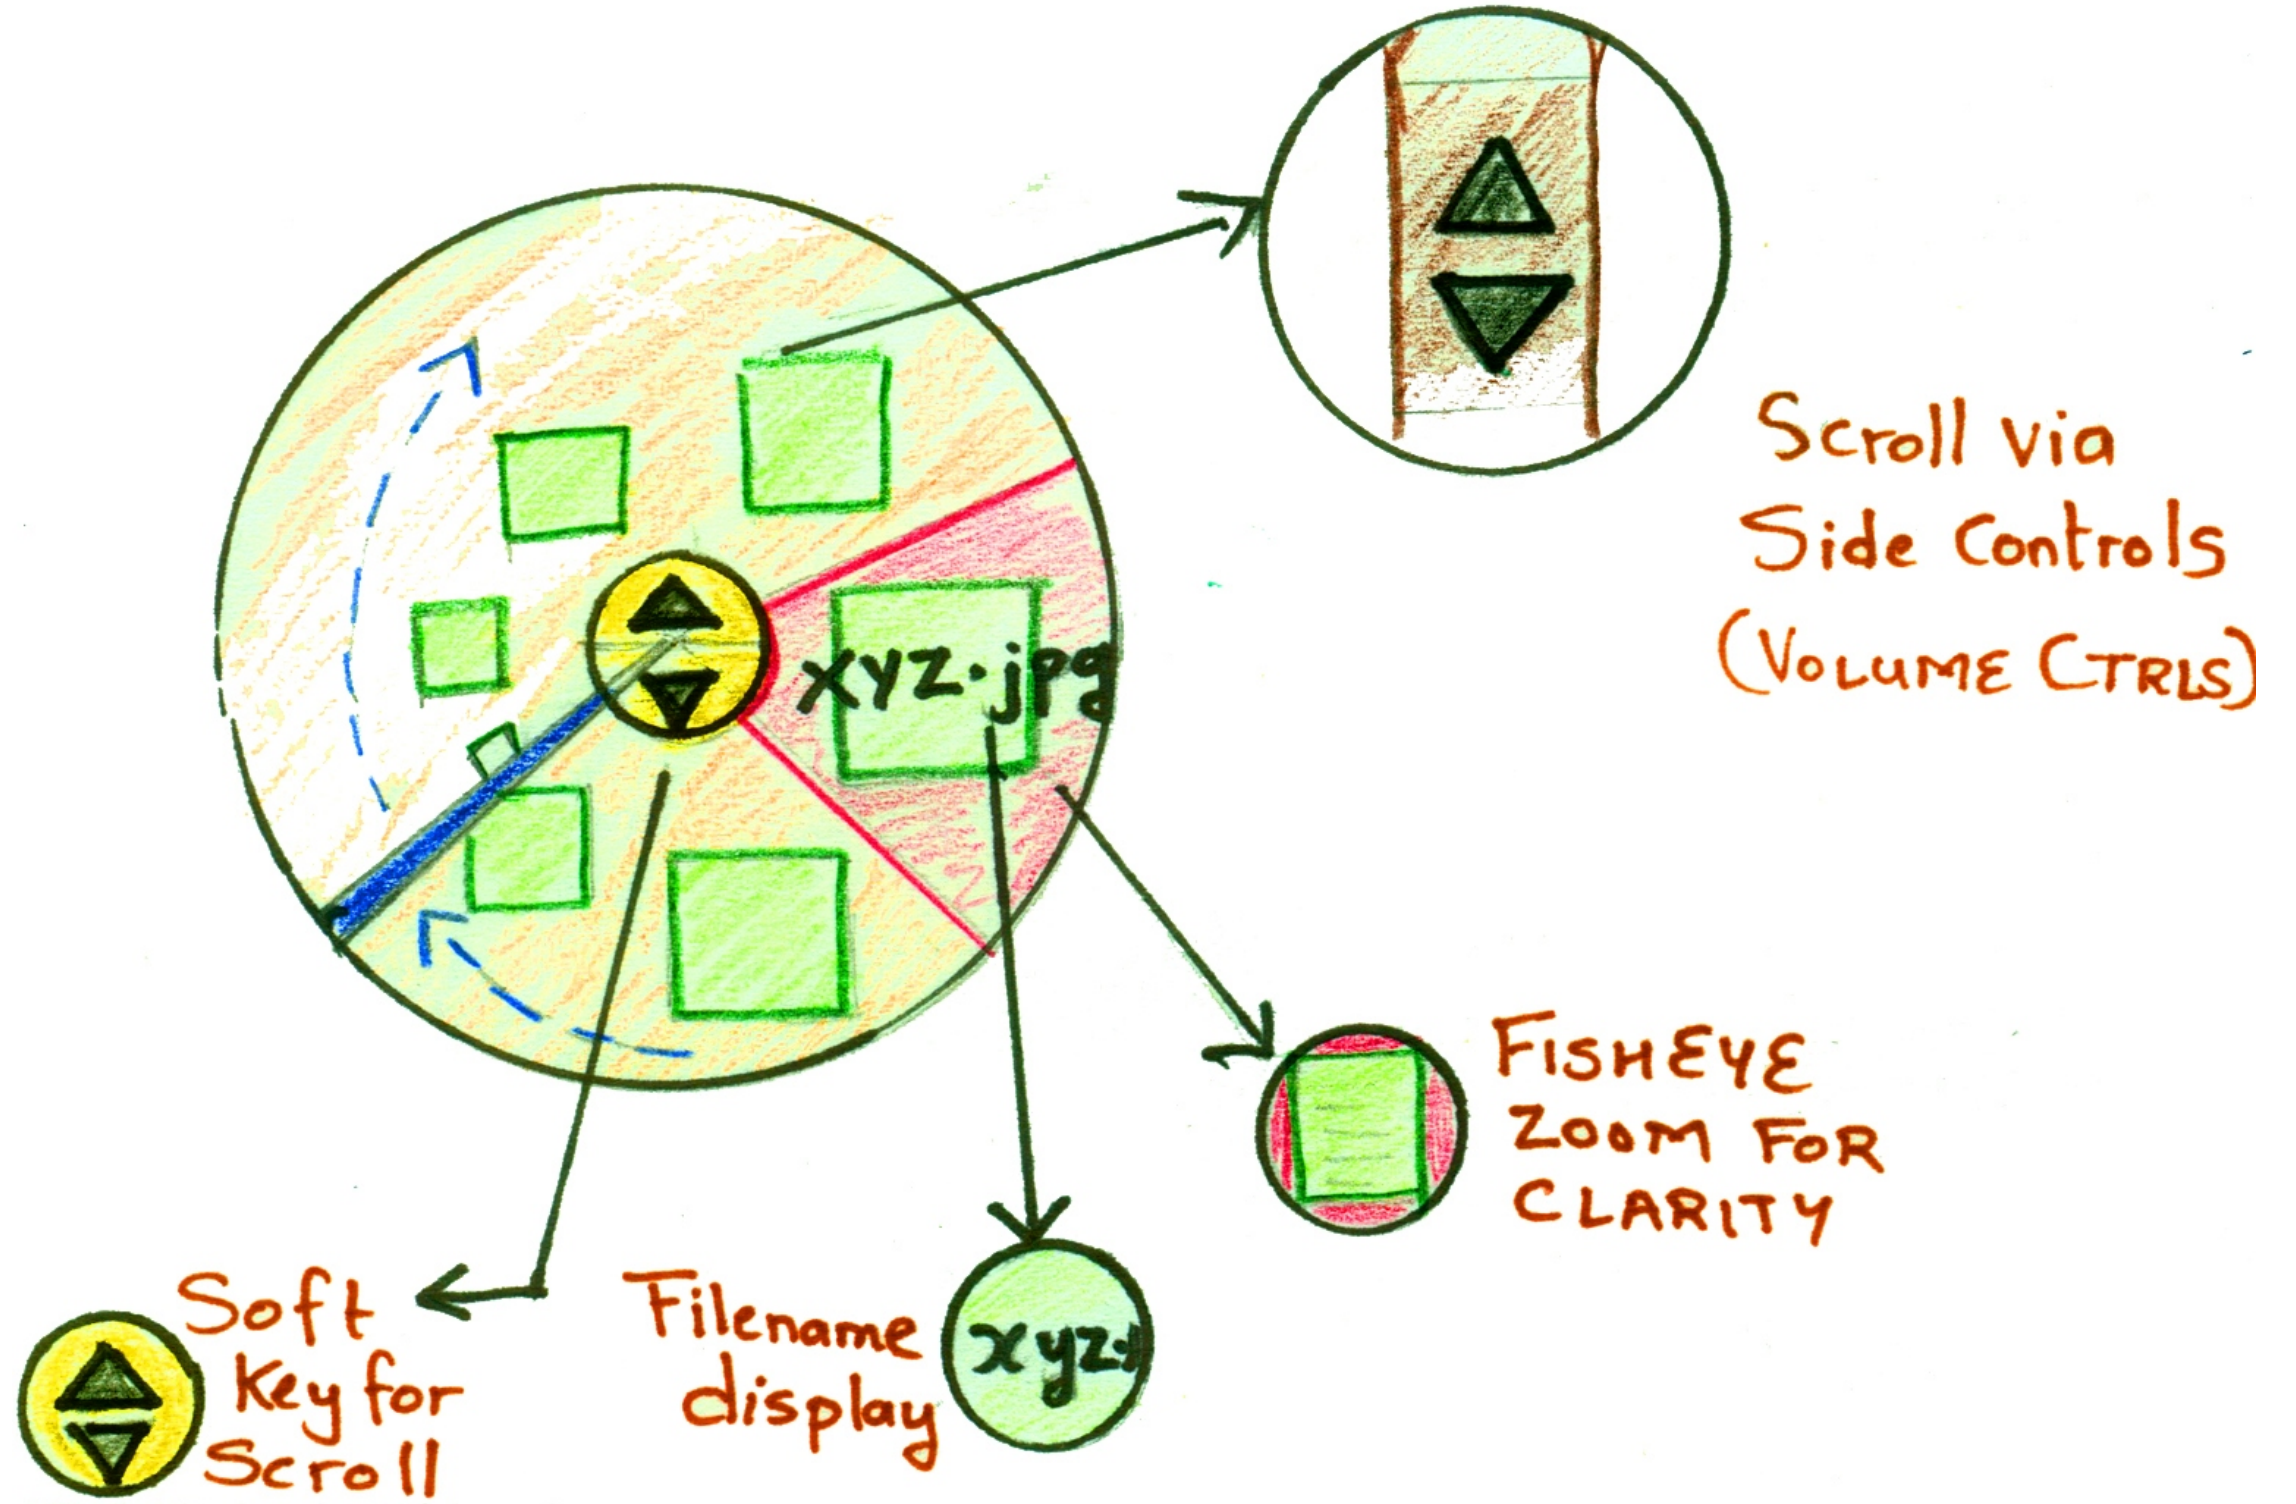

Folder Enters Fish Eye
Zoom Area

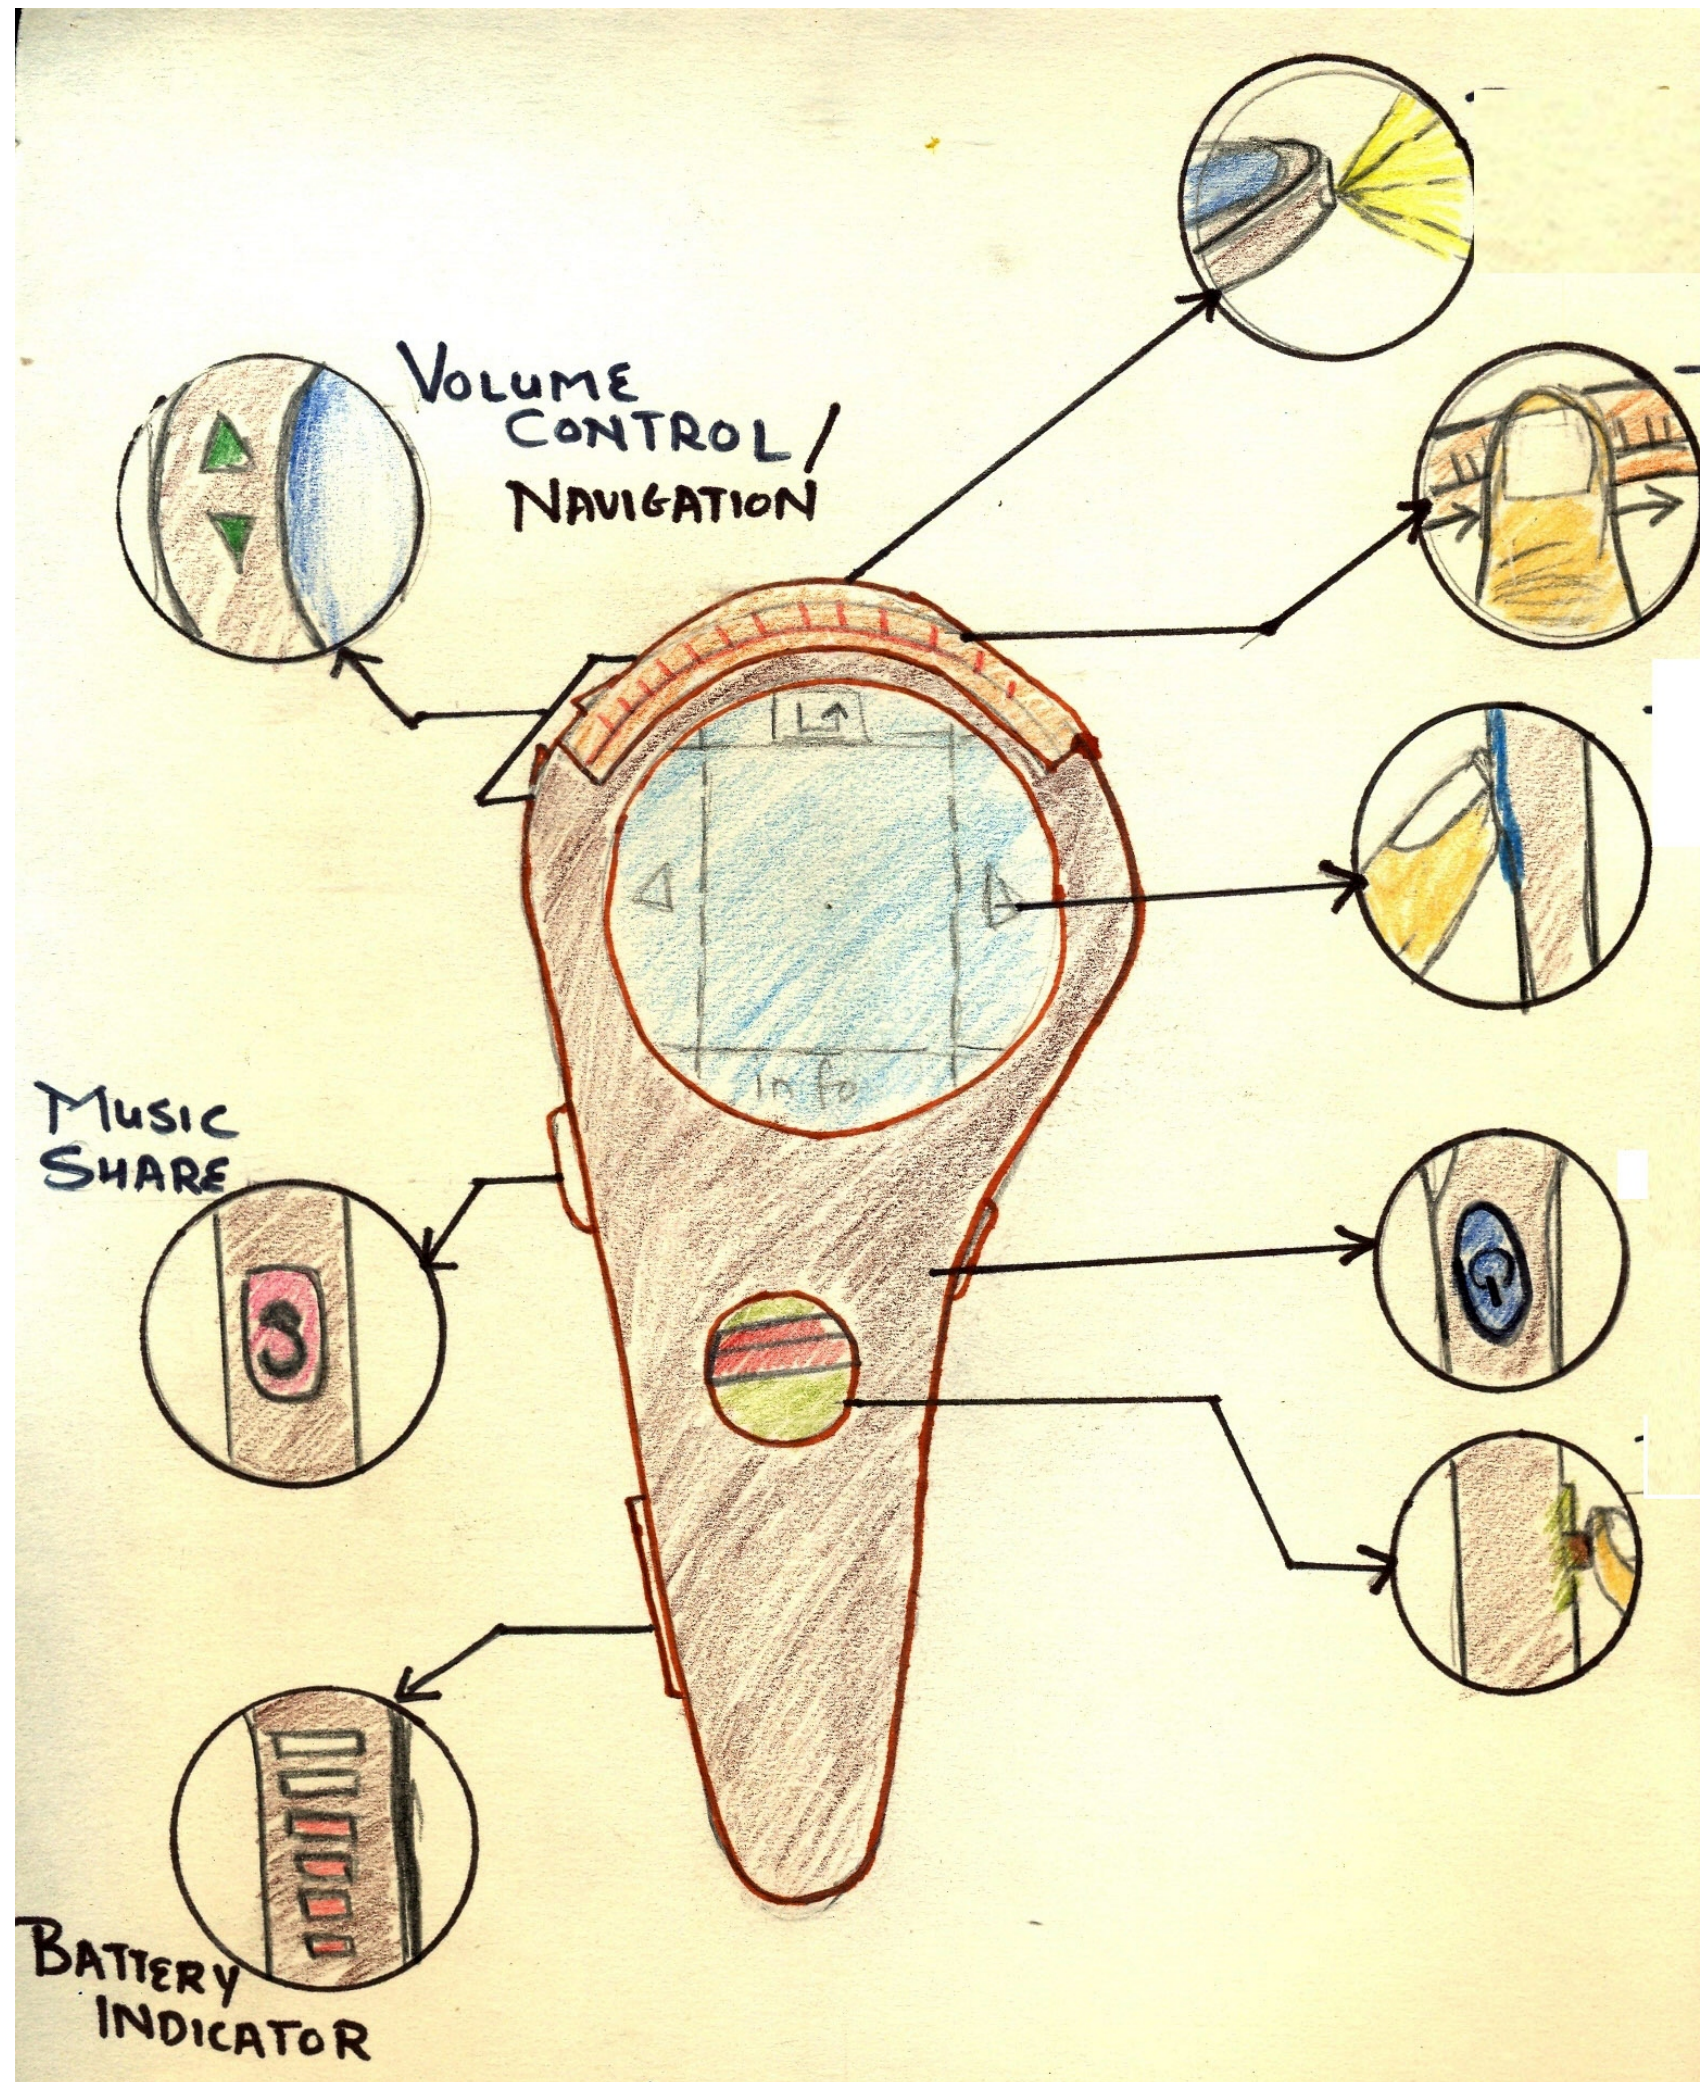

Folder is selected
using thumb based
touch

Folder opens another
spiral

Circular Interface layouts: The Device

The display screen acts as a touch screen button base also and will allow change in controls as and when the particular interaction is required
